10% extra discount

Crosby IP

Ever since SKP's foundation, we have been distributing IP's plate clamps. The impeccable quality and the 10-year guarantee give you confidence in hoisting your sheet metal.

SKP has also been an acknowledged service centre of the Crosby IP clamp for over 20 years. Our service technicians are certified for quality repairs.

The IP10 clamp is the best known type in the range. They can be used for lifting steel plates and small profiles, for 180° turning of plates and for manipulating steel constructions. Even at the minimum lifting load of 10% of the safe working load (WLL) these clamps prove their reliability.

* Trade in your old plate clamp and receive an extra discount on the promotional price when purchasing one new clamp. You will also receive a free maintenance set for the purchased clamp (assembly hours not included).

Type	Article	WLL (kgs)	Opening	Lifting eye	Price/st. promotion
IP10 0.5	WEB12039000	500	0-16	star	€ 215,00
